List of Contents

NUMBER 1

Y. T. Zhang and **Y. B. Fu**	1	A micro-mechanical model of woven fabric and its application to the analysis of buckling under uniaxial tension. Part 2: buckling analysis
C. Rubio-Gonzalez and **J. J. Mason**	15	Dynamic stress intensity factor for a propagating semi-infinite crack in orthotropic materials
H. S. Qian and **Y. C. Gao**	39	Large deformation character of two kinds of models for rubber
J. M. Golden	53	Consequences of non-uniqueness in the free energy of materials with memory
O. Song, J. -B. Kim and **L. Librescu**	71	Synergistic implications of tailoring and adaptive materials technology on vibration control of anisotropic thin-walled beams
P. F. Wang	95	Dispersion resulting from aggregating hydrodynamic properties in water quality modeling

NUMBER 2

D. Fortune and **C. Vallee**	113	Bianchi identities in the case of large deformations
A. C. Baytaş and **I. Pop**	125	Natural convection in a trapezoidal enclosure filled with a porous medium
T. Hayat, A. M. Siddiqui and **S. Asghar**	135	Some simple flows of an Oldroyd-B fluid
Yu. A. Rossikhin and **M. V. Shitikova**	149	A new method for solving dynamic problems of fractional derivative viscoelasticity
H. M. Park and **O. Y. Kim**	177	Reduction of modes for the control of viscous flows
I. H. Herron	201	Onset of convection in a porous medium with internal heat source and variable gravity
J. M. Hill and **A. M. Milan**	209	Finite elastic plane strain bending of sectors of circular cylindrical tubes
D. P. Sekulic	229	Molten aluminum equilibrium membrane formed during controlled atmosphere brazing
	243	Corrigendum

PII: S0020-7225(01)00057-X

NUMBER 3

M. Díez and **C. Atkinson**	245	The Rayleigh problem for nematic liquid crystals.Similarity solutions
Y. Z. Povstenko	285	Axisymmetric ring loading in a nonlocal elastic space
R. Kulchytsky-Zhyhailo	303	A simplified solution for three-dimensional contact problem with heat generation
A. P. S. Selvadurai	317	On Boussinesq's problem
Ji-Huan He	323	Coupled variational principles of piezoelectricity
H. Volkan Ersoy	343	Unsteady flow due to a sudden pull of eccentric rotating disks

NUMBER 4

E. Smith	355	Fracture initiation at the root of a sharp groove: description in terms of K_r–L_r failure assessment curves
F. Wu, L. Chen, C. Wu, F. Sun and **Y. Zhu**	361	Optimization of irreversible magnetic Stirling cryocoolers
L.-F. Ma, Y.-H. Chen and **S.-Y. Zhang**	369	On the explicit formulations of circular tube, bar and shell of cylindrically piezoelectric material under pressuring loading
J. C. Misra and **S. K. Pandey**	387	Peristaltic flow of a multilayered power-law fluid through a cylindrical tube
A. Kryshtafovych and **R. Martynyak**	403	Strength of a system of mated anisotropic half-planes with surface recesses
M. Siline and **A. I. Leonov**	415	On flows of viscoelastic liquids in long channels and dies
H. Demiray	439	Solitary waves in fluid-filled elastic tubes: weakly dispersive case
B. Wang, Y. Liu and **Z. Xiao**	453	Dynamical modelling of the chain structure formation in electrorheological fluids
A. G. Kotousov	477	A method for obtaining approximate solutions for highly dynamic problems

NUMBER 5

S. Matysiak and **R. Mieszkowski**	491	On modelling of diffusion processes in periodically stratified elastic solids
J.-L. Auriault and **C. Boutin**	503	Waves in bubbly liquids with phase change
P. D. Ariel	529	Axisymmetric flow of a second grade fluid past a stretching sheet

G. de Saxcé	555	Divergence and curl of a product of linear mapping fields and applications to the large deformations
G. Akgün and **H. Demiray**	563	Interactions of nonlinear acoustic waves in a fluid-filled elastic tube
B. Singh	583	Reflection and refraction of plane waves at a liquid/thermo-microstretch elastic solid interface
C. V. Sri Krishna	599	Effects of non-inertial acceleration on the onset of convection in a second-order fluid-saturated porous medium

NUMBER 6

J. Murali Krishnan and **C. Lakshmana Rao**	611	Permeability and bleeding of asphalt concrete using mixture theory
H. Demiray	629	Solitary waves in elastic tubes filled with a layered fluid
L. Stagni	641	Elastic analysis of a multilayered cylindrical fiber with eigenstrains
M. Ciarletta	655	Spatial decay estimates for heat-conducting micropolar fluids
E. H. Ahmad and **H. M. Badr**	669	Mixed convection from an elliptic tube placed in a fluctuating free stream
P. B. Entchev, **D. C. Lagoudas** and **J. C. Slattery**	695	Effects of non-planar geometries and volumetric expansion in the modeling of oxidation in titanium
P. Vadasz and **S. Govender**	715	Stability and stationary convection induced by gravity and centrifugal forces in a rotating porous layer distant from the axis of rotation
	733	Announcement

NUMBER 7

I. Paraschiv-Munteanu and N. D. Cristescu	737	Stress relaxation during creep of rocks around deep boreholes
J. N. Pernin and **E. Jacquet**	755	Elasticity in highly heterogeneous composite medium: threshold phenomenon and homogenization
M. A. Ezzat	799	Free convection effects on perfectly conducting fluid
X. L. Wang and **W. J. Stronge**	821	Micro-polar theory for a periodic force on the edge of elastic honeycomb

NUMBER 8

M. Idemen and **A. Alkumru**	851	A new method for the source localization in sectionally homogeneous bounded domains involving finitely many inner interfaces of arbitrary shapes
L. Graziano and **A. Marasco**	873	Balance laws for continua with an interface deduced from multiphase continuous models with a transition layer
M.-I. Char, J.-D. Lin and **H.-T. Chen**	897	Conjugate mixed convection laminar non-Darcy film condensation along a vertical plate in a porous medium
H. S. Takhar, R. Bhargava and **R. S. Agarwal**	913	Finite element solution of micropolar fluid flow from an enclosed rotating disc with suction and injection
W. Hussain and **R. W. Ogden**	929	The effect of pre-strain on the reflection and transmission of plane waves at an elastic interface
A. Cortis and **D. M. J. Smeulders**	951	On the viscous length scale of wedge-shaped porous media
L. Xiaobing	963	On the shear instability of saturated soil

NUMBER 9

C. Atkinson and **M. Díez**	973	The Rayleigh problem for nematic liquid crystals. Short time solution
G. Franceschini and **R. Flori**	1013	Vibrations of a body supported by shear mountings of incompressible material with memory
M. Brünig	1033	A framework for large strain elastic–plastic damage mechanics based on metric transformations
G. Gentili and **C. Giorgi**	1057	A new model for rate-independent hysteresis in permanent magnets

NUMBER 10

P. Schiavone	1091	Integral solutions of mixed problems in a theory of plane strain elasticity with microstructure
X.-C. Shang and **C.-J. Cheng**	1101	Exact solution for cavitated bifurcation for compressible hyperelastic materials
J. Petersson	1119	On continuity of the design-to-state mappings for trusses with variable topology
A. P. Rigatos and N. C. Charalambakis	1143	Two-dimensional adiabatic Newtonian flow with temperature-dependent viscosity
T.-H. Jean and **J. Peddieson**	1167	Mathematical modeling of particulate suspension flows in vertical circular pipes

NUMBER 11

D. A. Anderson and **I. W. Stewart**	1191	Stability of non-constant equilibrium states in a finite sample of ferroelectric liquid crystal
M. I. A. Othman	1217	Electrohydrodynamic stability in a horizontal viscoelastic fluid layer in the presence of a vertical temperature gradient
R. Rocca and **M. Cocu**	1233	Existence and approximation of a solution to quasistatic Signorini problem with local friction
M. Nosonovsky and **G. G. Adams**	1257	Dilatational and shear waves induced by the frictional sliding of two elastic half-spaces
F. Jin, Z. Wang and **T. Wang**	1271	The Bleustein–Gulyaev (B–G) wave in a piezoelectric layered half-space
	1287	Announcement

NUMBER 12

J. I. Ramos	1289	Nonlinear dynamics of hollow, compound jets at low Reynolds numbers
P. C. Biswal and **A. Ramachandra Rao**	1315	Thermal instability in a three-dimensional rigid container with prescribed heat flux at lower boundary
S.-S. Hsieh, L.-C. Chang and **T.-Y. Yang**	1327	Developing 3-D turbulent mixed convection in a circular duct inserted with longitudinal strips
A. Liaqat and **A. C. Baytaş**	1351	Characteristics of conjugate free convection in a corium pool formed during a severe reactor accident
C. G. Provatidis	1361	An analytical model for stress analysis of a tooth in translation
M. A. Ezzat, M. I. Othman and **A. A. Smaan**	1383	State space approach to two-dimensional electromagneto–thermoelastic problem with two relaxation times
J. Liu, L. Xianglin and **Z. Yongbin**	1405	Green's functions for anisotropic magnetoelectroelastic solids with an elliptical cavity or a crack

NUMBER 13

	1419	In Memoriam
E. Wierzbicki, Cz. Woźniak and **M. Woźniak**	1429	On the modelling of transient micro-motions and near-boundary phenomena in a stratified elastic layer
S. D. Akbarov, N. Yahnioglu and **Z. Kutug**	1443	On the three-dimensional stability loss problem of the viscoelastic composite plate
M. S. Wu	1459	Characteristics of a disclinated Zener crack with cohesive end zones

C. A. Bosello — 1487 — Well posedness for a general boundary condition problem in electromagnetism

A. Achiq and J. K. Naciri — 1499 — Asymptotic solutions of the wake induced by a streamwise moving flat plate in a channel

A. L. Svistkov — 1509 — Mechanical properties and mass transfer of viscoelastic deformable media

1533 — Erratum

NUMBER 14

L. Tao, J. D. Humphrey and K. R. Rajagopal — 1535 — A mixture theory for heat-induced alterations in hydration and mechanical properties in soft tissues

D. Srinivasacharya, J. V. R. Murthy and D. Venugopalam — 1557 — Unsteady stokes flow of micropolar fluid between two parallel porous plates

M. H. M. Moussa — 1565 — Similarity solutions to non-linear partial differential equation of physical phenomena represented by the Zakharov–Kuznetsov equation

K. E. Barrett — 1577 — Variational principle for two-dimensional high Hartmann number flow

I. Demir and H. M. Zbib — 1597 — A mesoscopic model for inelastic deformation and damage

C.-Y. Hsieh — 1617 — Effects of multiple surface scattering from randomly rough surfaces

E. M. Aboeldahab and E. M. E. Elbarbary — 1641 — Hall current effect on magnetohydrodynamic free-convection flow past a semi-infinite vertical plate with mass transfer

1653 — Announcement

NUMBER 15

J. N. Pernin and E. Jacquet — 1655 — Elasticity and viscoelasticity in highly heterogeneous composite medium: threshold phenomenon and homogenization

S. E. Wright, D. S. Scott, J. B. Haddow and M. A. Rosen — 1691 — On the entropy of radiative heat transfer in engineering thermodynamics

H.-G. Yoon, J. Peddieson and K. R. Purdy — 1707 — Non-linear response of a generalized Rijke tube

P. D. Chinh — 1725 — Bounds on uncertainty intervals for elastic moduli of completely random aggregates of hexagonal crystals

K. L. Verma and N. Hasebe — 1739 — Wave propagation in plates of general anisotropic media in generalized thermoelasticity

A. Carini and **F. Genna** 1765 Variational formulations in the non-associated flow theory of plasticity

J. G. Simmonds 1785 Correspondence

NUMBER 16

S. Chirită 1787 Uniqueness and continuous dependence of solutions to the incompressible micropolar flows forward and backward in time

A. K. Soh, J.-x. Liu and **D.-n. Fang** 1803 Explicit expressions of the generalized Barnett–Lothe tensors for anisotropic piezoelectric materials

D. Iesan and L. Nappa 1815 On the plane strain of microstretch elastic solids

D. D. Gray, J. Huang and **B. F. Edwards** 1837 Two-dimensional magnetothermal plumes

V. K. Kalpakides 1863 On the symmetries and similarity solutions of one-dimensional, non-linear thermoelasticity

N. A. Kelson and **A. Desseaux** 1881 Effect of surface conditions on flow of a micropolar fluid driven by a porous stretching sheet

NUMBER 17

N. Charalambakis 1899 Shear stability and strain, strain-rate and temperature-dependent "cold" work

K. Ikeda, S. Okazawa, K. Terada, H. Noguchi and **T. Usami** 1913 Recursive bifurcation of tensile steel specimens

J. I. Ramos 1935 Singularities and stability of inviscid, planar liquid membranes

J. I. Ramos 1949 Stability and nonlinear dynamics of planar film casting processes

K. Ikeda, S. Murakami, I. Saiki, I. Sano and **N. Oguma** 1963 Image simulation of uniform materials subjected to recursive bifurcation

A. T. Chan 2001 Atmospheric turbulent boundary layer development due to a change in surface roughness

NUMBER 18

A.-S. Bretelle, M. Cocou and **Y. Monerie** 2015 Unilateral contact with adhesion and friction between two hyperelastic bodies

Y. Liu, C.Q. Ru, P. Schiavone and **A. Mioduchowski** 2033 New phenomena concerning the effect of imperfect bonding on radial matrix cracking in fiber composites

D. Iesan and **L. Nappa** 2051 Extremum principles and existence results in micromorphic elasticity

T. Koureas,
A. Charalambopoulos and
V. K. Kalpakides 2071 On isovector fields and similarity solutions of generalized dynamic thermoelasticity

A. Liaqat and **A.C. Baytaş** 2089 Cooling of molten core material within a pressurised water reactor vessel lower head: interaction of surface radiation and wall conduction with free convection
